

Utilization of Additional Subsidization Authority in the Clean Water and Drinking Water State Revolving Fund Programs

Report to Congress

April 2014

The Fiscal Year (FY) 2012 Consolidated Appropriations Act (P.L. 112-74) (Appropriations Act) required that not less than 20 percent but not more than 30 percent of the funds made available for CWSRF capitalization grants over \$1 billion and not less than 20 percent but not more than 30 percent of the funds made available for DWSRF capitalization grants shall be used by the State to provide additional subsidy to eligible recipients. The Joint Explanatory Statement accompanying the Appropriations Act directed the EPA to report on how States have implemented their additional subsidization authority since its inception.

This report provides Congress with information on the number and amounts of loans that included additional subsidization from the FY 2010 appropriation. This includes information on additional subsidization, recipients, and projects. Due to the multi-year nature of the SRF funding process, complete data state use of additional subsidy through the SRFs is only available for the FY 2010 appropriation. The report encompasses \$637,390,450 in CWSRF subsidization across 657 assistance agreements and \$399,576,892 in DWSRF subsidization across 623 assistance agreements.

Part I

Introduction and Background

The SRF Programs

The United States Environmental Protection Agency (EPA) has a long standing history of providing financial support in the interests of public health and water quality. Beginning in the 1970s, the Construction Grants program oversaw considerable federal investment in our nation's wastewater infrastructure. Despite this infusion of federal dollars, later decades brought increased need for repair and replacement of assets. EPA began to consider alternative strategies to provide states with a permanent source of funding that would not be fully dependent on federal contributions.

With this goal in mind, Congress introduced a new model for providing financial assistance. The Clean Water State Revolving Fund (CWSRF) was established by the 1987 amendments to the Clean Water Act (CWA) providing states with a continuous source of funding for water quality projects, including nonpoint source, watershed protection and restoration, estuary management, as well as traditional municipal wastewater treatment.

Further, in 1996, Congress established the Drinking Water State Revolving Fund (DWSRF) as an integral part of the Safe Drinking Water Act (SDWA) Amendments, which reflect a comprehensive "source to tap" approach to protecting public health. The DWSRF provides states with a continuous source of funding for infrastructure improvements to drinking water systems, including construction related to water treatment, transmission and distribution, storage, and source. It also allows states to use set-aside funds to carry out a range of public health protection activities, including providing technical assistance to water systems that need help in becoming ready to use DWSRF funds for infrastructure improvements.

Funds to capitalize SRF programs are provided through federal grants and state matching funds equal to twenty percent of the federal contribution. At the state level, CWSRF and DWSRF

monies are loaned to communities while repayments are recycled back into the program to fund additional projects. The revolving nature of these programs provides a self-sustaining source of funding for communities in need of drinking water and wastewater infrastructure improvements. This collaboration between EPA and the states is the largest source of federal funding for wastewater and drinking water infrastructure projects in the country. However, the vast majority of funding for water and wastewater infrastructure is non-federal.

The SRF Funding Process

States have the remainder of the fiscal year in which their funds were appropriated, as well as the following fiscal year, to apply for and receive their capitalization grants. Capitalization grant funds are made available to states based on a payment schedule negotiated between the state and EPA. Capitalization grant payments are not actual cash disbursements; rather, they represent increases to the total amount of capitalization grant funds available from the state's Federal Treasury account for cash draw. All payments must be made within eight quarters after the capitalization grant is awarded or twelve quarters after the funds are allotted to states, whichever occurs first. Within one year of taking payment, the state must enter into binding commitments equal to 120 percent of the payment. A binding commitment is a legal obligation by the state to the assistance recipient that defines the terms of assistance from the SRF. It is important to recognize that not all states utilize assistance agreements as binding commitments. Letters or other legally binding forms of communication also may serve this purpose, in which case the state and assistance recipient may have reached a clear understanding of how assistance will be provided, but not have executed a final loan agreement.

As SRF assistance recipients incur costs, the SRF program submits a request for a cash draw covering the federal share of the incurred costs. The intent in using this mechanism is to make SRF capitalization grant funds available, when needed, for actual construction-related costs.

Additional Subsidization Requirements

The 1996 SDWA amendments created within the DWSRF a discretionary subsidy program for "disadvantaged communities" as defined by the state based on publicly-reviewed criteria approved by EPA. Under this provision, states could decide to provide a subsidy to those communities of up to 30% of the grant in the form of negative interest rates, principal forgiveness or loan-term extension. Nineteen states used that capability prior to the American Recovery and Reinvestment Act (ARRA).

ARRA introduced new requirements to both the CWSRF and DWSRF communities. Of the \$6 billion appropriated to both programs, not less than 50 percent of a state's ARRA allotment had to be provided in the form of grants, principal forgiveness, or negative interest rate loans. These options have the effect of reducing the repayment amount or absolving the loan altogether. A key driver in the provision of additional subsidization under ARRA was the requirement that all dollars be under contract by February 17, 2010. As a result, subsidy requirements were met within a one-year time frame. Subsequent to ARRA, additional subsidization is required to be provided within a capitalization grant's period of performance, typically seven years.

Figure 1: SRF Subsidy Appropriation Requirements

	Pre-ARRA ¹	ARRA	2010	2011	2012
DW Subsidy	Up to 30% of grant (5% used historically)	50-100% of grant	30-100% of grant	30-100% of grant	20-30% of grant
DW Appropriation Amount	-	\$2 billion	\$1.4 billion	\$963 million	\$918 million
CW Subsidy	No subsidy	50-100% of grant	Not less than 30% of grant dollars over \$1 billion	Not less than 30% of grant dollars over \$1 billion	Not less than 20% but not more than 30% of the grant dollars over \$1 billion
CW Appropriation Amount	-	\$4 billion	\$2.1 billion	\$1.5 billion	\$1.4 billion

1. Pre-ARRA subsidy was optional. After ARRA, provision of subsidy is no longer tied to disadvantaged communities.

Figure 1 indicates how appropriations following ARRA carried forward different variations of the additional subsidization requirement. The Fiscal Year (FY) 2012 Consolidated Appropriations Act (P.L. 112-74) (Appropriations Act) required that not less than 20 percent but not more than 30 percent of the funds made available for CWSRF capitalization grants over \$1 billion and not less than 20 percent but not more than 30 percent of the funds made available for DWSRF capitalization grants shall be used by the State to provide additional subsidy to eligible recipients. The Joint Explanatory Statement accompanying the Appropriations Act directed the EPA to report on how States have implemented their additional subsidization authority since its inception. This report provides Congress with information on the number and amounts of loans awarded with FY 2010 additional subsidization, recipients, and projects funded.

Report Methodology

This report contains data entered into the Clean Water Benefits Reporting (CBR) and Drinking Water Project Benefits Reporting (PBR) data systems. CBR and PBR, respectively, are the primary mechanisms for project level data collection in the CWSRF and DWSRF programs. Beginning in FY 2010, capitalization grant conditions require states to report on the use of all SRF funds in CBR and PBR. Required data fields include the use of funds for additional subsidization, as well as information on the projected environmental and public health benefits of SRF assistance agreements. Data must be entered in the quarter in which the final loan agreement was executed. Until such time as a loan agreement is executed, the terms of assistance and project information will not be reflected in CBR and PBR.

Due to the multi-year nature of the SRF funding process, this report only contains data for loans that were provided subsidy under the FY 2010 appropriation. These data most completely reflect how states implemented their additional subsidization authority.

Part II

CWSRF Utilization of Additional Subsidy Authority

The FY 2010 Appropriations Act required that not less than 30% of the funds made available to each State for CWSRF capitalization grants be used by the state to provide additional subsidy to eligible recipients in the form of principal forgiveness, negative interest loans, or grants. The provision only applied to \$996,915,000 of the total appropriation, which was the portion of the amount available for CWSRF capitalization grants that exceeded \$1 billion. The CWSRFs were required to provide at least 30% of this amount or, \$299,074,500, with the option of being able to provide up to \$996,915,000. Therefore, States were required to provide between 15 and 50 percent of their capitalization grant as additional subsidization. These percentages are based on the total amount available for capitalizations grants or \$1,996,915,000.

In addition to the additional subsidization requirement, the Joint Explanatory Statement accompanying the Appropriations Act encouraged states to give priority for additional subsidization to projects in communities that could not otherwise afford an SRF loan. Which applicants meet that criterion is left to the discretion of the states; however, for many states median household income (MHI) is a key indicator of affordability. Appendix D to this report contains recipient and project information, including a comparison of recipient to state MHI. The figure below displays the distribution of FY 2010 additional subsidization across four MHI ranges:

Figure 2: FY 2010 CWSRF Subsidy Distribution by Median Household Income

Community MHI as a Percentage of State MHI	Number of Loans ¹	Amount of Additional Subsidization ²	Average Amount of Additional Subsidization per Loan
0-50%	8	\$19,521,649	\$2,440,206
51-100%	489	\$495,762,602	\$1,013,829
101-150%	147	\$101,462,201	\$690,219
>150%	12	\$7,377,028	\$614,752

1. CWSRF loan recipients can finance multiple projects.

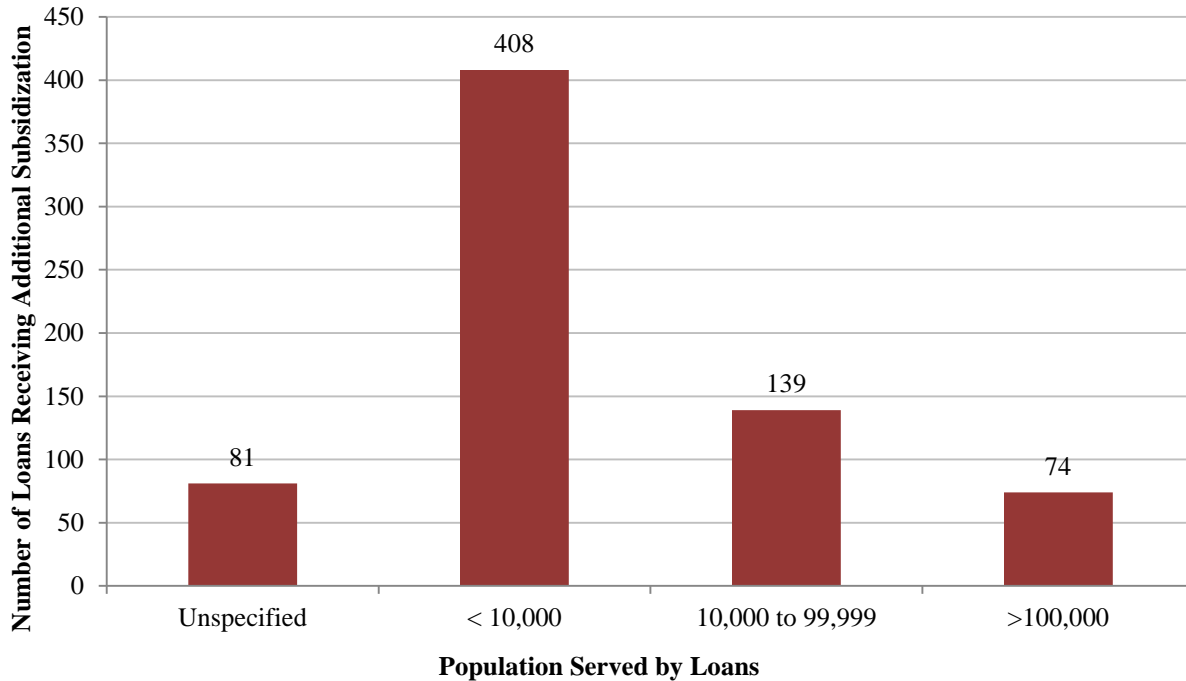

2. Does not include additional subsidization dollars for Puerto Rico as no MHI data was available.

To date, 75 percent of loans that included FY 2010 additional subsidization were made to communities that were below or equal to their state MHI. The four MHI categories above also reveal that as community MHI increases the average amount of subsidy per project decreases. These figures indicate that states are generally prioritizing additional subsidization in a manner consistent with congressional direction. Communities with the greatest financial need are receiving the highest amount of subsidization.

Appendix A shows the minimum and maximum amounts of additional subsidization states were required to provide. The table reveals a wide distribution between states in terms of the amount of additional subsidization provided. Fifteen states provided more than 40 percent of their capitalization grants as additional subsidization. Of these, South Carolina, Kansas, South Dakota, Puerto Rico, Illinois, and West Virginia provided the full maximum. Seventeen states formed the middle ground of the distribution, providing between 20 and 40 percent of their capitalization grant as additional subsidization. On the low end of the spectrum, nineteen states provided less than 20 percent as additional subsidization. At 7 percent, Louisiana is currently below the minimum additional subsidization for FY 2010.

It should be emphasized that under the authority of post-ARRA appropriations, no time frame was specified during which additional subsidization must be provided. Unlike ARRA, which required that all dollars had to be in executed loan agreements and under contract within one year, states are now executing loan agreements in accordance with the traditional SRF funding process described above. Although Louisiana is currently below the minimum requirement for FY 2010, their SRF program has binding commitments in place that will meet the requirement in full. Based on status updates from EPA Regional staff, the agency anticipates these loan agreements will be executed during calendar year 2014.

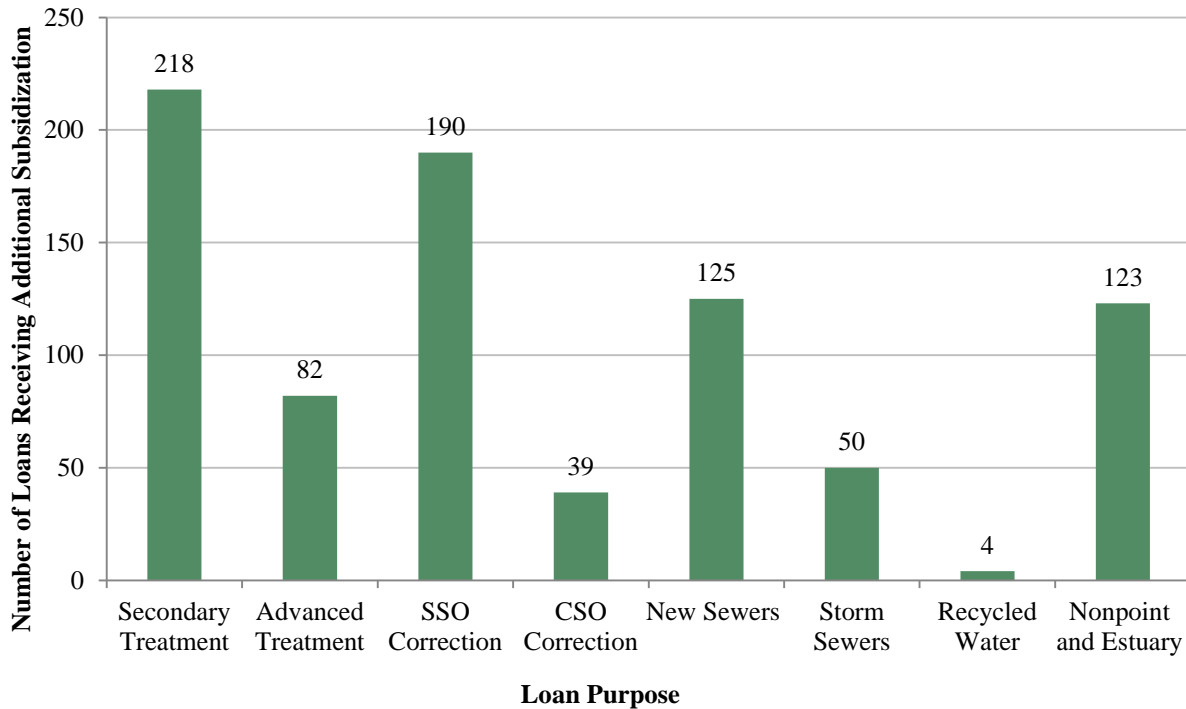

Figure 3: Population Served by Loans Receiving Additional Subsidization from the FY 2010 Appropriation

EPA also examined data on the population served by CWSRF loans with additional subsidization from the FY 2010 appropriation. 58 percent of the loans receiving subsidization serve populations of 10,000 or less. While not directly examining community wealth demographics, EPA considers this information important to understanding additional subsidization as well, since smaller populations may lack the financial capability of larger assistance recipients. 19 percent of loans receiving subsidization serve populations of 10,000 to 99,999 and the final 11 percent serve populations greater than 100,000. These data are subject to change as 12 percent of the loans in CBR did not have an amount specified for project population served. The number of loans receiving additional subsidy under the FY 2010 authority also is expected to increase during 2014, but EPA expects that new data will reflect the funding trends identified in Figure 3.

Figure 4: Types of Loans Receiving Additional Subsidization from the FY 2010 Appropriation

(Note: A single loan can be identified as serving multiple needs categories)

States used the FY 2010 funding for additional subsidy in a manner broadly similar to the use of their traditional loan funds. The CWSRF program was designed to allow states the flexibility to fund projects based on water quality priorities. As a result, state programs use additional subsidization to fund a wide range of projects ranging from wastewater treatment to nonpoint source and estuary protection.

Traditionally, the largest amount of CWSRF funding finances publicly owned treatment works under Section 212 of the CWA. This trend holds true with the states' provision of additional subsidization. Out of a broad spectrum of needs categories, which are not mutually exclusive, 85 percent of projects receiving additional subsidy are classified as Section 212 projects, while the remaining 15 percent fund nonpoint source and estuary protection.

Part III

DWSRF Utilization of Additional Subsidy Authority

The FY 2010 Appropriations Act required that not less than 30% of the funds made available to each State for DWSRF capitalization grants be used by the state to provide additional subsidy to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants. As noted previously, the requirement was a change from the historical DWSRF provision allowing States to establish a “disadvantaged assistance” program that could include additional reductions to interest charged, extended loan terms, and forgiveness of principal up to 30% of their grant.

In addition to the additional subsidization requirement, the Conference Committee’s Joint Explanatory Statement for the Appropriations Act encouraged states to give priority for additional subsidization to projects in communities that could not otherwise afford an SRF loan. Which applicants meet that criterion is left to the discretion of the states. However, for many states, median household income (MHI) is a key indicator of affordability. Appendix E to this report contains recipient and project information, including a comparison of recipient to state MHI. The figure below displays the distribution of FY 2010 additional subsidization across four MHI ranges:

Figure 5: FY 2010 DWSRF Subsidy Distribution by Median Household Income

Community MHI as a Percentage of State MHI	Number of Loans ¹	Amount of Additional Subsidization ²	Average Amount of Additional Subsidization per Loan
0-50%	16	\$20,141,532	\$1,258,846
51-100%	516	\$328,843,552	\$637,293
101-150%	86	\$43,650,900	\$507,568
>150%	4	\$1,511,708	\$377,927

1. DWSRF loan recipients can finance multiple projects.

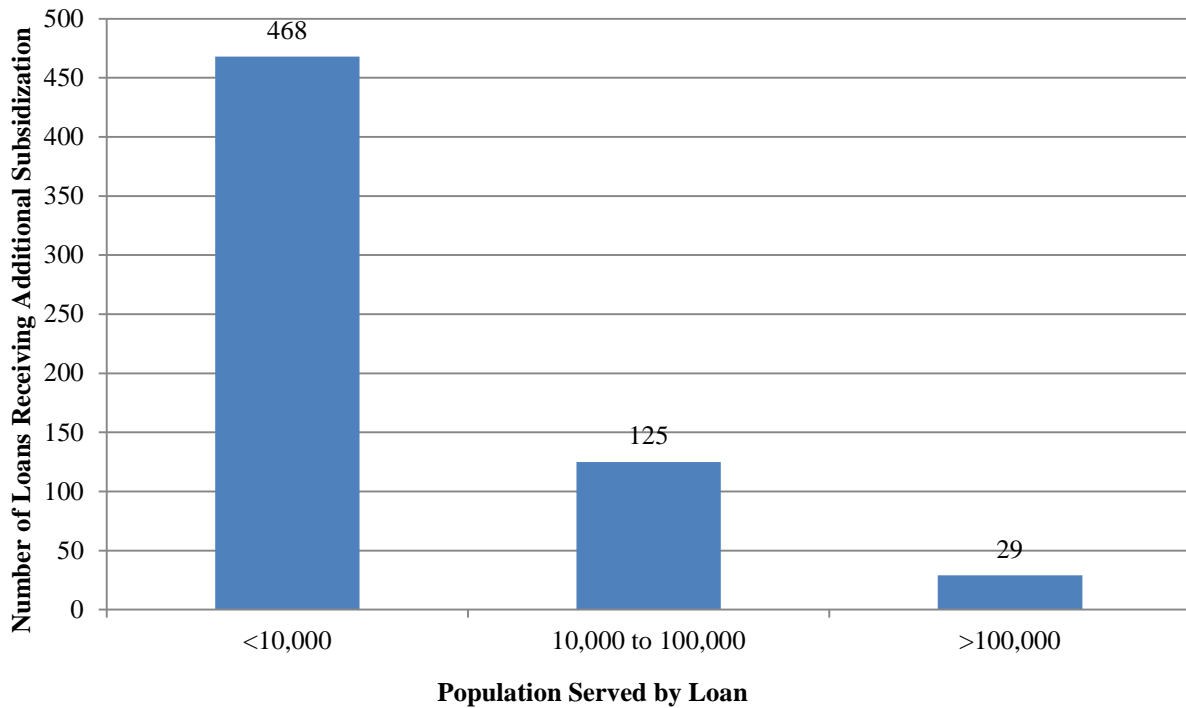

2. Does not include additional subsidization dollars for Puerto Rico as no MHI data was available.

To date, 85 percent of loans that received FY 2010 additional subsidization were awarded to communities that were below their state MHI. The four MHI categories above also reveal that as community MHI increases the average amount of subsidy per project decreases. These figures indicate that states are generally making a concerted effort to prioritize additional subsidization in a manner consistent with congressional direction. Communities with the greatest financial need are receiving a higher amount of subsidization.

The table included in Appendix B shows the minimum amounts of additional subsidization states were required to provide for their 2010 grant. Forty one states provided 30 percent or more of their grants as additional subsidization. Of these, South Dakota, New Mexico, Maryland, Virginia, South Carolina, and Puerto Rico provided 40% of their grant as subsidy as of the reporting period. Eight States reported between 15% and 30% of their grant amounts as committed to loans with subsidy. Two States reported less than 15% of their grant amount as committed to loans with subsidy. All States not yet at the minimum required subsidy level are either: 1) waiting for final loan agreements to be executed that will raise their additional subsidization provided to the minimum amount required, 2) at 30% already, but the data will not be uploaded until the next reporting period, or 3) waiting to finalize subsidy amounts at project completion. Loan amounts can change over the life of a project and final amounts are not reported until the projects are completed. If needed, unused subsidy is put into new loans. For example, three States below 30% currently had been above 30% in the summer of 2013.

It should be emphasized that under the authority of post-ARRA appropriations, grant awards do not specify a time frame during which additional subsidization must be provided. Unlike ARRA, which specified that all funds had to be in executed loan agreements and under contract within one year, states are now executing loan agreements in accordance with the traditional SRF funding process described above. Although there are states that provided less than the required minimum of 30 percent through February 10, 2014, these states have not yet completed executing assistance agreements with subsidy, and know they are required to do so.

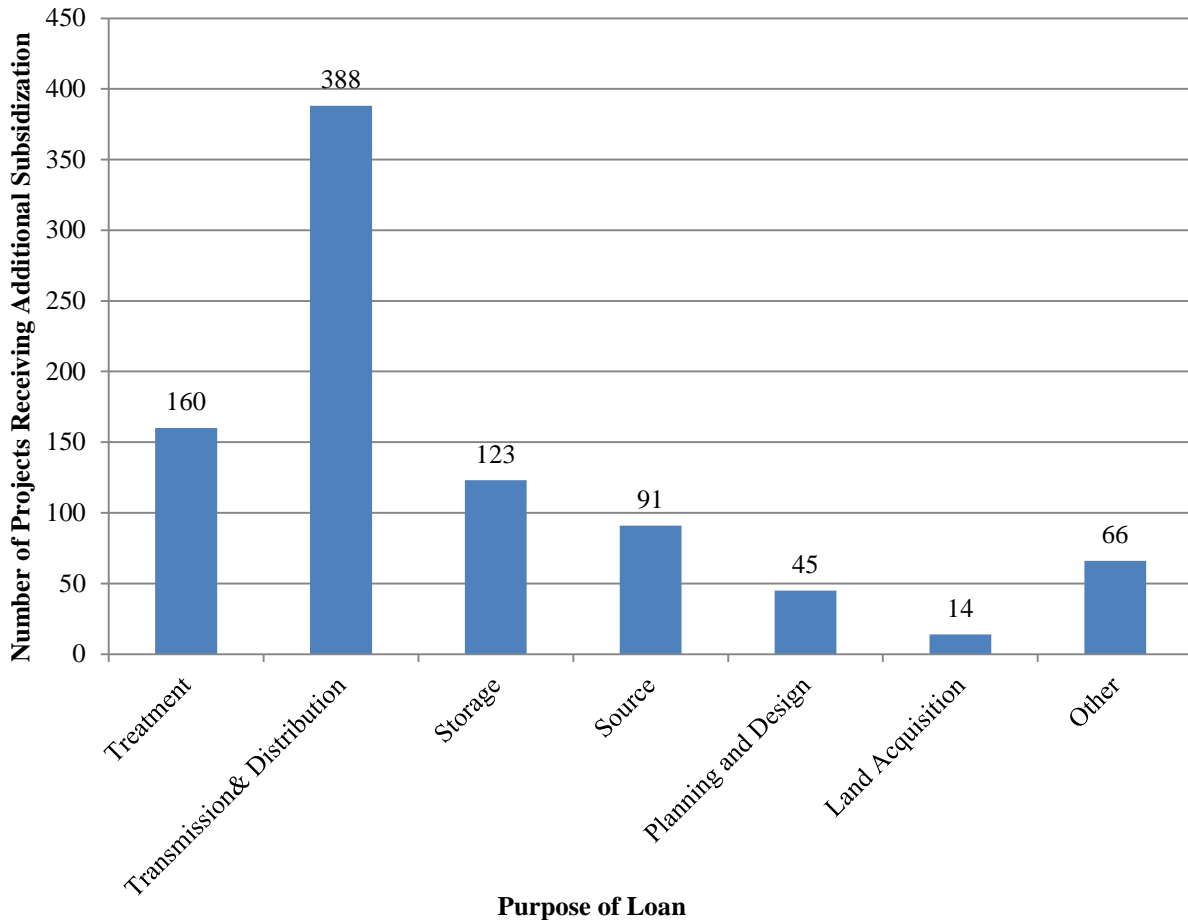

Figure 6: Population Served by Loans Receiving Additional Subsidization

EPA also examined data on the population served by DWSRF loans funded with additional subsidization from the FY 2010 appropriation. About 75 percent of the loans receiving subsidization serve populations of 10,000 or fewer people. While not directly examining community wealth demographics, EPA considers this information important to understanding additional subsidization as well, since smaller populations may lack the capability of larger assistance recipients. About 20 percent of loans receiving subsidization serve populations of 10,000 to 100,000 and an additional 5 percent serve populations greater than 100,000.

Figure 7: Types of Loans Receiving Additional Subsidization

(Note: A single loan can be identified as serving multiple needs categories)

The DWSRF program was designed to allow states the flexibility to fund loans based on public health needs. As a result, state programs use additional subsidization to fund a wide range of loans ranging from treatment to planning and design. When states enter data into PBR, needs categories are selected for each loan in order to identify which types of projects are being financed. Since multiple needs categories can be identified for a project, the total number of loans represented in Figure 7 is higher than the total number of projects that received FY 2010 subsidization.

Historically, the largest amount of DWSRF funding finances drinking water infrastructure have been for treatment, transmission, and distribution. About 86 percent of loans receiving additional subsidy are classified as construction (treatment, transmission & distribution, storage, and source). “Other” projects can include green components that do not fall into one of the above categories.

Appendix A: Clean Water State Revolving Fund FY 2010 Additional Subsidization Requirements

State	FY 2010 Appropriation Capitalization Grant (Allotment Less 604(b)) ¹	Minimum Amount that must be provided as Additional Subsidization ²	Maximum Amount that may be provided as Additional Subsidization	Amount provided as Additional Subsidization as of April 2014	Additional Subsidy provided as a percent of FY 2010 Appropriation
South Carolina	\$ 20,873,000	\$ 3,126,113	\$ 10,420,377	\$ 10,420,377	50%

Alabama	\$ 22,783,000	\$ 3,412,170	\$ 11,373,901	\$ 3,412,170	15%
North Dakota	\$ 10,002,000	\$ 1,497,982	\$ 4,993,274	\$ 1,497,982	15%
Delaware	\$ 10,002,000	\$ 1,497,982	\$ 4,993,274	\$ 1,497,982	15%
Oklahoma	\$ 16,461,000	\$ 2,465,335	\$ 8,217,785	\$ 2,465,335	15%
Arkansas	\$ 13,328,000	\$ 1,996,111	\$ 6,653,705	\$ 1,996,111	15%
Michigan	\$ 87,608,000	\$ 13,120,898	\$ 43,736,328	\$ 13,120,899	15%
Louisiana*	\$ 22,398,000	\$ 3,354,510	\$ 11,181,699	\$ 1,475,000	7%
Total	\$ 1,996,915,000	\$ 299,074,500	\$ 996,915,000	\$ 637,390,450	32%

1. Of the funds allotted to the states, 1 percent or \$100,000, whichever is greater, is taken off the top and provided for 604b water quality planning grants. The remaining amount is provided as capitalization grants.

2. The FY 2010 Appropriation Act requires that not less than 30% of the funds made available to each State for CWSRF capitalization grants shall be used by the State to provide additional subsidization to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants. However, this requirement only applies to the portion of the CWSRF capitalization grant appropriation that exceeds \$1 Billion. Thus, states were required to provide between 15 and 50% of their capitalization grants as additional subsidization.

*Below minimum additional subsidization requirement

Appendix B: Drinking Water State Revolving Fund FY 2010 Additional Subsidization Requirements

State	FY 2010 Appropriation Capitalization Grant	Minimum Amount that <i>must be provided</i> as Additional Subsidization*	Amount provided as Additional Subsidization as of April 2014	Additional Subsidy provided as a percent of FY 2010 Appropriation
South Dakota	\$ 13,573,000	\$ 4,071,900	\$ 13,504,075	99%
New Mexico	\$ 13,573,000	\$ 4,071,900	\$ 8,207,636	60%
Maryland	\$ 21,059,000	\$ 6,317,700	\$ 11,143,528	53%
Virginia	\$ 23,008,000	\$ 6,902,400	\$ 11,527,844	50%
South Carolina	\$ 13,573,000	\$ 4,071,900	\$ 5,636,084	42%
Puerto Rico	\$ 13,573,000	\$ 4,071,900	\$ 5,429,200	40%
Delaware	\$ 13,573,000	\$ 4,071,900	\$ 5,252,310	39%
Minnesota	\$ 23,219,133	\$ 6,965,740	\$ 8,973,702	39%
Texas	\$ 67,628,080	\$ 20,288,424	\$ 25,905,131	38%
Utah	\$ 13,573,000	\$ 4,071,900	\$ 5,063,000	37%

Total	\$ 1,302,663,086	\$ 390,798,926	\$ 399,576,892	31%

* The FY 2010 Appropriation Act requires that not less than 30% of the funds made available to each State for DWSRF capitalization grants shall be used by the State to provide additional subsidy to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants. The amounts listed for each State do not include funds to non-State entities, such as Tribes, Alaskan Native Villages, Territories other than Puerto Rico, and UCMR funds.

**Below minimum additional subsidization requirement

**Appendix C: Additional Information and Timeline for CWSRF and
DWSRF Programs Below Minimum FY 2010 Additional Subsidization Requirement as of
April 2014**

CWSRF	Projected Timeline for Meeting FY 2010 Additional Subsidization Requirement¹
Louisiana	Two projects had to be redesigned due to higher than expected bid costs. Region 6 anticipates the loans will be executed by December 2014.
DWSRF	Projected Timeline for Meeting FY 2010 Additional Subsidization Requirement
Hawaii	June 2014
Kansas	April 2014 – Kansas had been at target, but some project changes have resulted in a temporary decrease.
North Carolina	December 2014
Louisiana	December 2014
California	April 2014
Idaho	December 2014
New York	NY had been at target, but some project changes have resulted in a temporary decrease. NY has since reapplied subsidy and is at target.
Missouri	July 2014
Rhode Island	July 2014
Michigan	October 2014

1. Projected timeline provided by calendar year.
