

Changes to the TNI Laboratory Accreditation Standards Coming Your Way Soon

Jerry Parr
The NELAC Institute

The NELAC Institute has 5 Expert Committees (Chemistry, Microbiology, Proficiency Testing, Quality Systems, and Radiochemistry) actively working to revise the current 2009 standard used for accrediting laboratories in the National Environmental Laboratory Accreditation Program (NELAP). A new standard is expected to be adopted by TNI's Consensus Standards Development Program in 2015. This presentation will highlight all of the changes that are expected to occur and provide an implementation timeline.
