

Errata Sheet for 2012 Recreational Water Quality Criteria

Issued October 27, 2014

Page 39, Section 3.6.2 The 2012 RWQC, first sentence in the second paragraph of this section should read as follows:

EPA is recommending that the GM of a waterbody be calculated in the same way as recommended in the 1986 criteria by taking the \log_{10} of sample values, averaging those values, and then raising 10 to the power of that average.
