

2015-2016 College and University Green Power Challenge

Throughout the 2015-16 academic year, EPA's Green Power Partnership tracked the collegiate athletic conferences with the highest combined green power usage in the nation. The College and University Green Power Challenge is open to any collegiate athletic conference in the United States.

On April 25, 2016, EPA concluded the Green Power Challenge and recognized a Champion Green Power Conference, as well as the largest single green power users within each participating conference as 2015-16 EPA Green Power Challenge conference champions. The Champion Green Power Conference and individual conference champions are listed below. To be listed, a conference must have at least one Green Power Partner and an aggregate green power purchase of at least 10 million kilowatt-hours (kWh) across the conference.

This list is current as of April 5, 2016. This is the final update to the 2015-16 College & University Green Power Challenge. Thank you and congratulations to all participating schools!

Interested in joining the 2016-17 Green Power Challenge? Check out our [Steps to Join Green Power Partnership](#) page for more information.

Individual Conference Champions

The following colleges and universities were recognized for having the largest individual green power purchase among all the schools in their conference. EPA applauds these schools for taking a leadership role in their conference and in supporting a better environmental future:
